Work through the series, including videos, to get up and running with object-oriented programming (OOP) and real-world application development using the Java language and platform.

[Introduction to Java programming – IBM Developer](#)

Java is a programming language created by James Gosling from Sun Microsystems (Sun) in 1991. The target of Java is to write a program once and then run this program on multiple operating systems. The first publicly available version of Java (Java 1.0) was released in 1995. Sun Microsystems was acquired by the Oracle Corporation in 2010.

[Introduction to Java programming - Tutorial](#)

[Definition:](#) " Java is a programming language that produces software for multiple platforms. When a programmer writes a Java application, the compiled code (known as bytecode) runs on most operating systems (OS), including Windows, Linux, and Mac OS. Java derives much of its syntax from the C and C++ programming languages. "
