This edited volume is based on the European Law Institute's project, The Rescue of Business in Insolvency Law, which ran from 2013 to 2016. The project sought to investigate and articulate the essential features of well-functioning procedures for the 'rescue' of distressed but viable businesses. Although the focus was primarily on the design and implementation of formal procedures (that is, those provided by law), the project also required consideration of the interaction between such procedures and informal solutions to distress, given the obvious cost advantages of the latter. The ELI project was not confined exclusively to restructurings, since these are only one possible route to maximising the value of a distressed but viable business (an auction procedure, in which the business is sold on a going concern basis to a new owner, is one obvious alternative). The ELI project encompasses various aspects of both public/constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures.

Business Law contains clear and detailed coverage of partnerships, company law, taxation, EU law, and insolvency, making the book ideally suited to the Legal Practice Course. Statutory references encourage students to refer to primary sources.

This Manual, which updates the first edition published in 1986, is a major advance in the standards for compilation and presentation of fiscal statistics. It is intended as a reference volume for compilers of government finance statistics, fiscal analysts, and other users of fiscal data. The Manual introduces accrual accounting, balance sheets, and complete coverage of government economic and financial activities. It covers concepts, definitions, classifications, and accounting rules, and provides a comprehensive framework for analysis, planning, and policy determination. To the extent possible, the Manual has been harmonized with the System of National Accounts 1993.

Recent insolvency cases highlight the growing importance of cross-border insolvency matters in international transactions. In order to obtain relevant information essential for conduct in such transactions, an insolvency lawyer needs to have access to the many relevant instruments that have been introduced and implemented in recent years, but that until now have not been available in any single place. This very useful volume collects, for the second time in one source, all important international and regional legal instruments relating to insolvency of companies and consumers, as well as to corporate rescue law. The book includes international and regional conventions, model laws, EU regulations and directives, and guiding principles produced by various international bodies (such as the World Bank, the United Nations Committee on International Trade Law (UNCITRAL), the American Law Institute, INSOL International, and INSOL Europe), and international and European restatements of insolvency law by scholars. In addition to reproducing the complete texts of these instruments, the editors provide insightful commentary covering such important matters as the following: • key issues of each text; • expected amendments and revisions; and • comparative analysis of instruments. A unique resource bringing together core material in the field of cross-border insolvency law and legislation, this book will be welcomed by international insolvency practitioners worldwide.
