Openamip

OpenAMIP is an IP based protocol that facilitates the exchange of information between an Antenna Controller Unit and a satellite router. It allows the router to command the antenna and enables the use of Automatic Beam Switching (ABS), which transfers connectivity from one satellite beam to the next as a vessel passes through multiple footprints.

OpenAMIP - Link Communications Systems

OpenAMIP is an IP-based protocol that facilitates the exchange of information between an antenna controller unit and a satellite.

OpenAMIP - ST Engineering iDirect

Figure 2: Sample Communication between Modem & ACS using OpenAMIP The "ident" message is an example of an extension and is not a general purpose OpenAMIP command. It is used to pass information about the antenna components to the modem, for reporting to the hub. This message must be sent upon initial connection between the ACS and the modem.
